

Dashboard 2 – Product & Resale Analytics:

This dashboard provides an in-depth view of EchoChain's product portfolio, resale pricing, market value, ownership cycle, product age, brand performance, and category-level resale performance. It brings together product and resale metrics in a single Power BI page.

Dashboard 2 – Image Overview:

Key outcomes from the dashboard:

- The dashboard covers 10,000 products, with an average resale price of ₹28,340.18 and an average market value of ₹48,830.03.
- The average resale discount is shown as 0.59%, while the average ownership cycle is 2.19 times and the average product age is 31.60 months.
- Cameras have the highest average resale price at approximately ₹49K, followed by Laptops at ₹42K and Gaming products at ₹39K.

- Laptops generate the highest category-level resale revenue at approximately ₹70.36M, followed by Smartphones at approximately ₹60.08M.
- Smartphones represent the largest product category with 1,986 products, followed by Laptops with 1,691 and Home Appliances with 1,337 products.
- Sony leads the Top 10 Brands by resale revenue with approximately ₹31M, followed by Apple at ₹26M and Lenovo at ₹20M.
- The ownership-cycle analysis shows resale prices remaining around ₹27K–₹29K across the first five cycles, with the highest level around the 3rd ownership cycle.
- The Original Price vs Resale Price scatter plot shows a clear positive relationship: products with higher original prices generally achieve higher resale prices across categories.
- The category performance summary shows an overall average resale price of ₹28,340.18 and an average original price of ₹69,700.91.
- The dashboard enables comparison of product categories, brands, ownership cycles, and product age to identify stronger resale opportunities and pricing patterns.
