

Dashboard 1 – Executive Overview:

This dashboard provides a high-level view of EchoChain's circular economy and resale business performance from January 2023 to December 2024. It brings together financial, transaction, regional, platform, customer, and product-disposition metrics in a single Power BI page.

Dashboard 1 – Image Overview:

Key outcomes from the dashboard:

- 10,000 transactions were recorded, with an original product value of ₹697.01M and resale revenue of ₹476.69M.
- The average resale price is ₹47,669, while the average circularity score is 72.6, indicating relatively strong circular-economy performance.
- Smartphones generate the highest resale revenue at ₹101.1M, followed by Laptops at ₹93.0M. Together, they contribute approximately 40.8% of total resale revenue.

- The West region leads transaction activity with 2,910 transactions (29.1%), followed by the North region with 2,640 transactions (26.4%).
- Amazon Renewed has the highest transaction volume among platforms with 2,230 transactions (22.3%), followed by Flipkart Refurbished with 2,010 transactions (20.1%).
- The final-disposition analysis shows that 53.4% of products are resold, followed by 20.6% refurbished, 15.1% recycled, and 10.9% sent to landfill.
- The resale revenue trend generally increases over the two years, reaching approximately ₹57M around late 2024, indicating positive marketplace growth.
- Mumbai is the leading city with 1,250 transactions (12.5%), followed by Bangalore with 1,180 transactions (11.8%).
- The dashboard reports 898,461 kg of CO₂ saved, demonstrating a measurable positive environmental impact from circular-economy activities.
- The average customer rating of 3.87/5 indicates a generally positive customer experience across the platform.
